PRESS CONFERENCE

Update on the search for the Higgs boson at CERN on the eve of the ICHEP 2012 Conference

Geneva, 22 June 2012.

Dear Journalists,

CERN will hold a scientific seminar at 9:00 CEST on 4 July to deliver the latest update in the search for the Higgs boson. At this seminar, coming on the eve of the year's major particle physics conference, ICHEP, in Melbourne, the ATLAS and CMS experiments will deliver the preliminary results of their 2012 data analysis.

The seminar begins at 9:00 CEST. The auditorium in which the seminar will be held is reserved for CERN personnel and researchers from the laboratory's user community, but a video stream will be relayed to another auditorium.

A press conference will follow the seminar in presence of CERN Director General, Rolf Heuer, ATLAS spokesperson, Fabiola Gianotti and CMS spokesperson, Joe Incandela.

Media wishing to **attend** the press conference on CERN site should fill in the registration form.

Both the seminar and the following Q&A will be webcast.

Webcast DOES NOT need registration. Journalists following the webcast may submit questions through Twitter using the hashtag #ICHEP2012.

Starts 4 Jul 2012 09:00
Ends 4 Jul 2012 13:30
